Professional Summary

Full Stack Developer with hands-on experience building responsive web applications using React, TypeScript, JavaScript, HTML5, and CSS3. Skilled in developing reusable UI components, integrating REST APIs and backend services, implementing authentication and role-based access, and supporting e-commerce workflows. Proficient in Git-based development, CI/CD, debugging, API testing, and technical documentation. Collaborative team member with experience working across Frontend, Backend, QA, UX, and Infrastructure teams in Agile environments.

Technical Skills

Frontend: React.js | TypeScript | JavaScript ES6+ | HTML5 | CSS3 | Responsive Web Design | Vite | Accessibility Fundamentals

APIs & Backend: REST APIs | JSON | Python | FastAPI | Java | Spring Boot | OpenAPI/Swagger | Postman

Data & Security: PostgreSQL | MySQL | Firebase Authentication | Keycloak | OAuth 2.0 | OIDC | PKCE | JWT

Tools & Practices: Git | GitHub | GitLab | Docker | CI/CD | GitHub Actions | npm | Agile/Scrum | AWS Cloud

Professional Experience

Full Stack Developer | Agencia Digital de Innovación Pública (ADIP) – November 2025 – Present

- Developed React components and user workflows for forms, navigation, and client-side validation, integrating frontend functionality with REST APIs and backend services.
- Implemented and debugged authentication and role-based access flows using Keycloak, OAuth 2.0, OpenID Connect, and PKCE.
- Developed and maintained Python and FastAPI backend components for user validation, integration logic, and REST API consumption.
- Validated endpoints using Postman and OpenAPI/Swagger and collaborated with Backend, QA, UX, and Infrastructure teams on integrations, deployments, documentation, and incident resolution using Git and GitLab.

Full Stack Developer | Maíz Fundido • Freelance – 2023 – Present

- Develop and maintain a responsive eCommerce application using React, TypeScript, JavaScript, HTML5, and CSS3, creating reusable components for product catalogs, product configuration, shopping carts, and administrative workflows.
- Integrate the frontend with REST APIs for authentication, user profiles, product variants, inventory, promotions, quotations, and order management, including validation, loading, and error-handling states.
- Contribute to an API-driven architecture using a TypeScript backend, PostgreSQL, Firebase Authentication, Docker, and cloud-based deployment and object storage services.
- Validate changes through automated tests, type checking, production builds, and CI/CD workflows using Git, GitHub, and GitHub Actions.
- Develop a Python and FastAPI service for validating and importing catalog information from structured spreadsheets into the eCommerce platform.

Full Stack Java Developer Project | Generation México – October 2025

- Developed a full-stack eCommerce application using Java, Spring Boot, MySQL, and REST APIs, implementing backend services, business logic, and frontend integration.
- Built responsive interfaces using HTML5, CSS3, and JavaScript and integrated them with REST endpoints.
- Worked in an Agile/Scrum team, contributing to backlog refinement, sprint planning, reviews, debugging, and collaborative delivery.

Education

Generation México | Java Full Stack Developer Program – 2025

Universidad Nacional Autónoma de México | Master's Degree in Teaching for Upper Secondary Education – 2018

Universidad Nacional Autónoma de México | Bachelor's Degree in Biology – 2013

Certifications

Google Agile Project Management – 2026 | AIFYC Java Full Stack – 2026 | Google AI Professional – 2026 | React – Udemy, 2025 | Modern JavaScript – Udemy, 2024 | AWS Cloud Practitioner Essentials | Cisco PCAP – Python

Professional Skills

Problem Solving | Debugging | Analytical Thinking | Cross-Functional Collaboration | Effective Communication | Technical Documentation | API Integration | Agile/Scrum | Adaptability | Continuous Learning | Languages: Spanish – Native | English – B2
